It is followed by A Steam Voyage down the Danube, with Sketches of Hungary, Wallachia, Servia, Turkey, &c. by Michael J. Quinn, author of a "visit to Spain," &c. The first part of which has already appeared.

Both these works have been noticed by the reviewers of England with unqualified maise.

The proprietors of this work impressed with the opinion that independently of abstruse and learned treaties, there is an ample demand, on the part of the reading public, for literary matter of a higher denomination than the new works of fiction, which are at presentso prodigefly disseminated among them, and for books that shall have a higher aim than the mere amusement and genf-ification of the idle; be feels assured also that with a moderate dication of the idle; he teels assured also that with a moderate degree of care and research, selections may easily be made among the literature of the day, which shall not be deficient in fational amusement, even when they are serving the nobler purpose of informing the mind, or improving the experience.—With this opinion and assurance he has been induced to commence the present series, in which he will endeavor to embody subjects worthy of being collected and retained, for the purpose of re-perusal, reflection, or reference, and which may not deteriorate the character of a gentleman's library.

riorate the character of a gentleman's library.

Mr. Constable of Edinburgh, was the first to discover that a signal service might be performed to the world, by embodying, in a cheap and compact form, a series of publications that should have utility as a primary object, but rational amusement in the manner of their concoction. By issuing a small portion at a time and in frequent succession, he conceived that he should impel the generality of his readers—not the studious or the literary ones, of course—to keep up with the publication, and not allow their reading to run in arrears. By a well timed and well judged selection of articles it is believed that he accomplished, not only this ostensible object, but a secret and more important one.

Gradually a desire for more solid reading increased in socre-Gradually a desire for more solid reading increased in socie-ty and that which originally began in the hope of anusement was continued in the wish for information. Useful matter was published at a comparatively cheap rate, it was continually in-creasing, yet the expense was hardly felt. Encouraged by his success, the enterprising publisher began to insert new matter in his selections, and the public in return rewarded his exertions and expenses by enlarged patroners.

and expenses by enlarged patronage.

Were Constable's Miscellany current in the United States pérhaps the publisher of the present series would not have found it expedient to commence the latter work. But, be it remembered, that in speaking of the chenpness of Constable it is but relatively—as compared with the publications in Great Britain generally—which is dearer than that of any part of the world. Constable's Miscellany is published at about half the English rate, but the present work proposes to be at about one third e-

The works collected into Foster's Cabinet Miscellany, will be in every range of polite literature. It is intended to suit, as much as possible, every taste, and by an agreeable variety of much as possible, every taste, and by an excitement for subjects as well as styles, to keep up a healthy excitement for entional entertainment. Wasks of great length, of severe and rational entertainment. Works of great length, of severe and deep investigation, and of the more abstruse sciences will, of course, find no place here. It is of the cheerful, elegant and easy writings of the day, that the selections will be made: always writings of the day, that only substantially good works will be introduced; in order to which the publisher will use every means to satisfy himself, before he commits a work to press.

It is trusted that the Cabinet Miscellany will be a melange of all that is valuable in-modern hierature; it will assuredly to the medium of introducing works which would hardly find then way to the American public generally, through any other source.
